

AdvisoryAI

Hack-to-Hire

India Edition

Solo Participation • Build the Future

Three Challenges

01

Template Builder

Build an intelligent system to create and manage document templates. Streamline workflows with personalization.

02

Proactive Chatbot

Develop a "Jarvis" assistant that anticipates needs and surfaces insights before being asked.

03

Agentic Chaser

Create an autonomous agent to follow up with clients and gather missing information.

Choose one. Work solo.

Evaluation Criteria

40%

Innovation

Creativity, code architecture, and technical excellence.

40%

Impact

Real-world value, usability, and efficiency gains.

20%

Presentation

Problem articulation and clarity of communication.
